## Perfil y estructura de las quiebras en Puerto Rico

### Resumen

La radicación de quiebras en Puerto Rico ha aumentado vertiginosamente en los últimos años. En este proyecto de investigación se estudia el perfil y la estructura de las quiebras personales y comerciales en Puerto Rico. Como parte de este perfil, se investiga el comportamiento histórico de las quiebras totales, comerciales y personales, así como sus distribuciones por región geográfica, por década y por capítulo durante el periodo estudiado (1987-2011). Se examina la relación entre el número de quiebras y algunos de los indicadores económicos de nuestro país, entre los que se encuentra el índice de actividad económica (IAE), el índice de precios al consumidor (IPC), empleo total y ventas al detal. Por último, se examina la estructura estocástica de las series de tiempo de los datos históricos de quiebras en Puerto Rico.

*Palabras claves:* quiebras, empresas, Puerto Rico

## I. Introducción

En estos momentos en que Puerto Rico atraviesa una crisis económica, me parece imprescindible estudiar y analizar el comportamiento de las quiebras personales y comerciales en nuestro país. La radicación de quiebras en Puerto Rico ha aumentado vertiginosamente en los últimos años. En este proyecto se estudia el perfil y la estructura de las quiebras personales y comerciales en Puerto Rico. Como parte de este perfil, se investiga el comportamiento histórico de las quiebras totales, comerciales y personales, así como sus distribuciones, durante el periodo estudiado (1987-2011), por región geográfica, década y capítulo. Se examina también la relación entre el número de quiebras y algunos de los indicadores económicos de nuestro país, en específico: índice de actividad económica (IAE), índice de precios al consumidor (IPC), empleo total, tasa de participación, tasa de desempleo y ventas al detalle. Por último, se examina la estructura estocástica de las series de tiempo que mejor describen los datos históricos de quiebras en Puerto Rico.

Este informe incluye todos los impresos de computadora de los análisis efectuados hasta el momento. La base de datos utilizada para estos análisis es una muy valiosa por dos aspectos principales: (1) fue suministrada directamente por la Corte Federal de Quiebras, la fuente que produce los mismo y (2) está compuesta por todos los casos de quiebra radicados en Puerto Rico del 1 de enero de 1987 al 30 de septiembre de 2011 distrito de Puerto Rico. En total hay 258,993 casos radicados durante ese periodo.

Los resultados están agrupados en cuatro secciones principales:

1. Comportamiento histórico de las quiebras en Puerto Rico, 1987-2011  
(págs. 5-8)
2. Características descriptivas de las quiebras durante el periodo 1987-2011  
(págs. 9-25)
3. Características descriptivas de las quiebras durante el periodo 2006-2010  
(págs. 26-45)
4. Análisis de regresión y correlación entre el número de quiebras y algunos indicadores económicos (págs. 46-54)

## I. Hallazgos y Análisis

El propósito principal del presente trabajo es producir un perfil de las quiebras personales y comerciales en Puerto Rico. Aunque este perfil no constituye una caracterización total de las quiebras en nuestra isla, nos permite conocer detalles poco estudiados y analizados.

Los resultados que expondremos en esta sección representan el análisis de 5 características descriptivas de las quiebras radicadas en Puerto Rico: capítulo, naturaleza del que radica (personal, comercial), deuda estimada, región geográfica (metro, norte, sur, etc.) y área geográfica (isla, metro). La información anterior se estudia en dos periodos de tiempo: del primero de enero de 1987 al 30 de septiembre de 2011, y del primero de enero de 2006 al 31 de diciembre de 2010. Se compararán el comportamiento de las quiebras durante estos dos períodos de tiempo.

La base de datos obtenida a través de la Corte de Quiebras Federal, distrito de Puerto Rico incluye todos los casos radicados desde el 1 de enero de 1987 hasta el 30 de septiembre de 2011. La misma consiste de 258,993 récords (casos radicados). Esta base de datos es muy valiosa ya que consiste de los “datos crudos” sobre las quiebras y fue provista por la fuente primaria de producción de los mismos.

Los resultados se presentan en cinco grandes categorías o secciones: en la primera se presenta el comportamiento histórico de las quiebras mensuales comerciales, personales y por capítulo; en la segunda se presenta las características descriptivas de las quiebras durante los períodos estudiados; en la tercera se examina la asociación entre varias características de las quiebras; en la cuarta se estudia la relación del número de quiebras radicadas con algunos índices económicos del país; y finalmente, en la quinta se explora la estructura estocástica de las series históricas de quiebras a través de varios modelos de series de tiempo. En todos estos análisis se examina la dinámica temporal que informan.

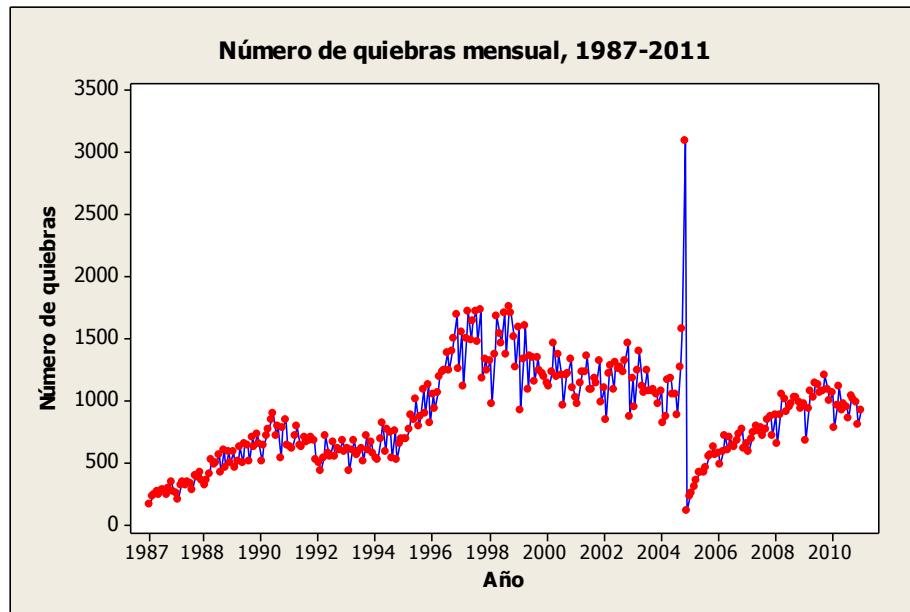

## A. Comportamiento histórico de las quiebras en Puerto Rico, 1987-2011

En esta sección estudiaremos el comportamiento histórico mensual de las quiebras totales, comerciales y personales en Puerto Rico desde el 1 de enero de 1987 al 31 de diciembre de 2011. También se presentará esta serie histórica por capítulo en que se radicó la quiebra.

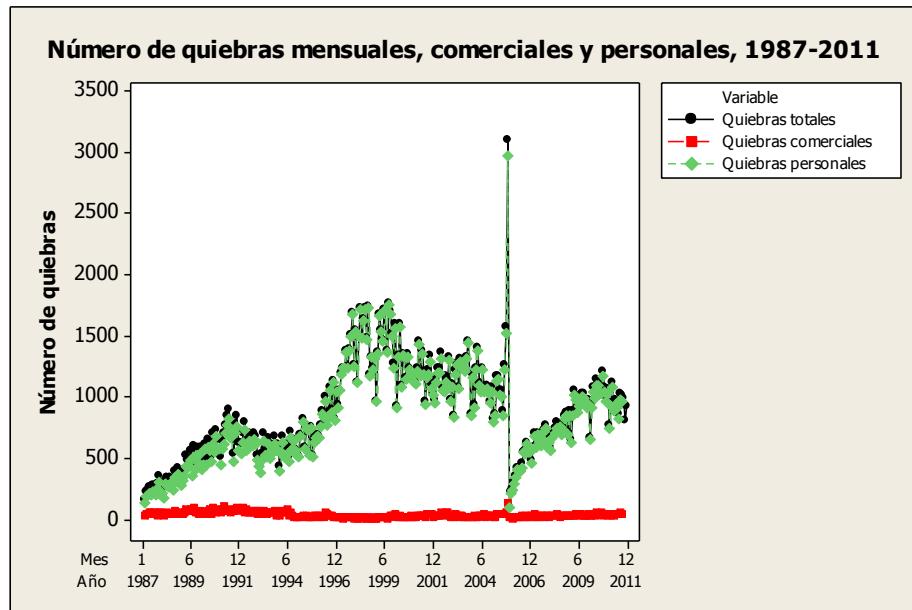

En el Panel A de la Gráfica 1 se presenta el número de quiebras mensual durante el periodo estudiado. En general la tendencia es un aumento en el número de quiebras radicadas de 1987 al 1997; del 1997 al 2004 el número de quiebras radicadas tiende a descender un poco y en el año 2005, hay un aumento vertiginoso en el número de quiebras. Luego de ese aumento, el próximo mes las quiebras descienden al número más bajo de esta serie, para desde ese punto ir en una tendencia ascendente hasta el 2010, y viendo una pequeña reducción en las quiebras radicadas en el 2011.

**Gráfica 1 Serie histórica mensual del número de quiebras entre los años 1987 al 2011**

### Panel A

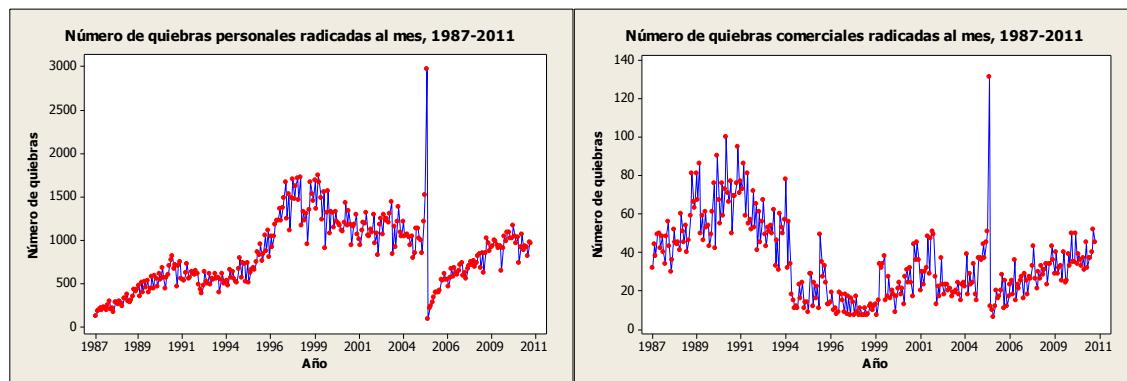

## Panel B

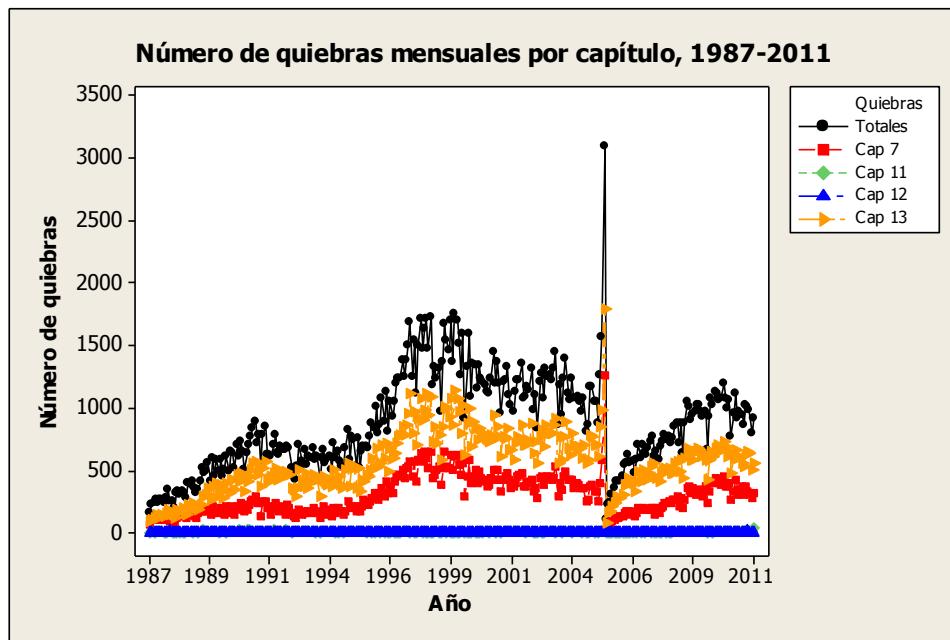

En el panel B de la Gráfica 1 se presenta la serie mensual del número de quiebras personales y comerciales junto a las quiebras totales. Se puede apreciar que el patrón de las quiebras personales sigue muy de cerca al patrón de las quiebras totales; esto es así ya que la mayor parte de las quiebras (más de un 90%) en Puerto Rico son radicadas por individuos. En la Gráfica 2 se aprecia mejor el patrón de las quiebras comerciales radicadas en Puerto Rico durante ese periodo.

**Gráfica 2 Serie histórica mensual del número de quiebras personales y comerciales entre los años 1987 al 2011**

En general, las quiebras comerciales radicadas ven un aumento del 1987 al 1991, cuando empiezan a reducirse hasta llegar a su punto más bajo en la serie entre el 1998 y 1999. Luego de ese punto, la tendencia es alcista hasta octubre del 2005, cuando ocurre un aumento drástico. El próximo mes se ve una reducción sustancial, llegando al nivel de 1999, y desde ese punto en adelante se ve un aumento en las quiebras año tras año.

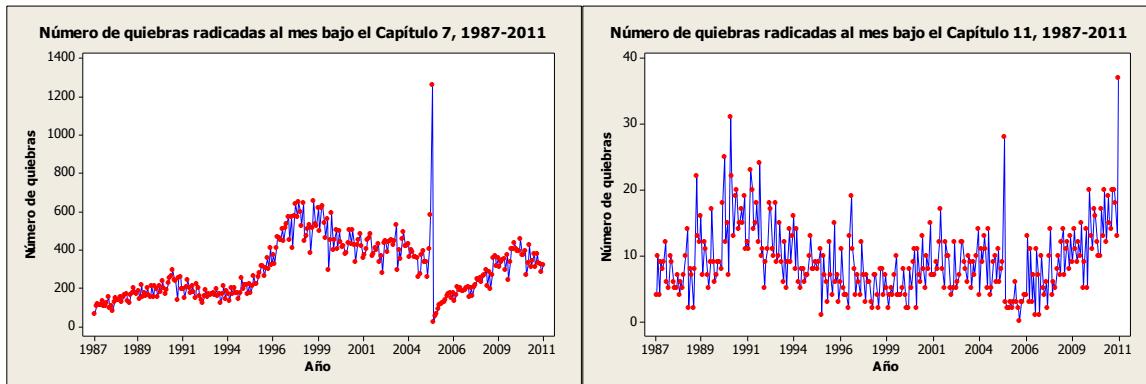

**Gráfica 3 Serie histórica mensual del número de quiebras por capítulo entre los años 1987 al 2011**

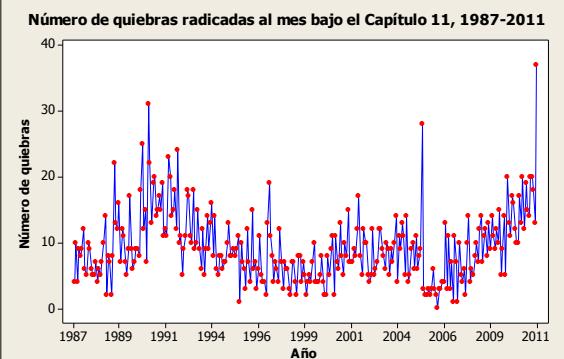

Si estudiamos la serie histórica mensual de quiebras por capítulo radicado, en la Gráfica 3 se observa que las quiebras radicadas bajo el Capítulo 13 y el Capítulo 7 siguen el mismo patrón general que las quiebras totales. Esto es así debido a que son los capítulos más utilizados en nuestra isla al momento de radicación de quiebras. En la Gráfica 4 se aprecia con más detalle el patrón de las quiebras radicadas por los Capítulos 7, 11, 12 y 13. Los paneles A y D, correspondientes a las quiebras radicadas bajo el Capítulo 7 y 13, respectivamente, exhiben el mismo patrón general.

**Gráfica 4 Serie histórica mensual del número de quiebras por capítulo entre los años 1987 al 2011**

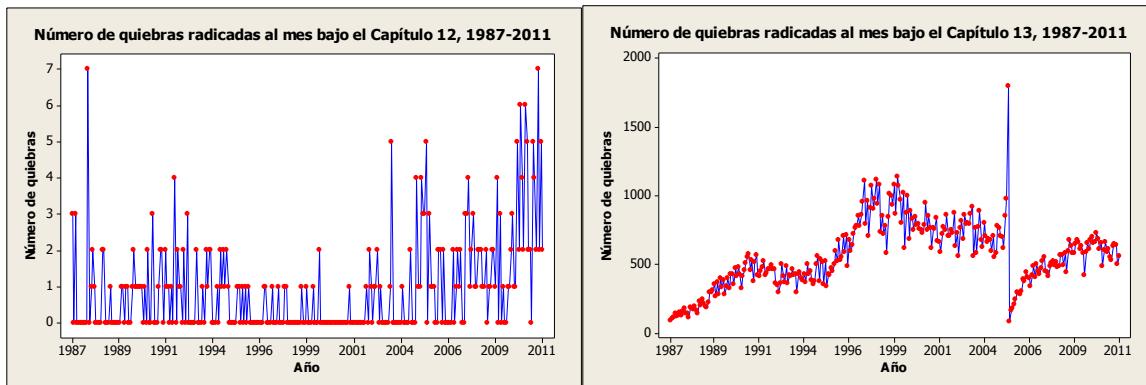

**Panel A**

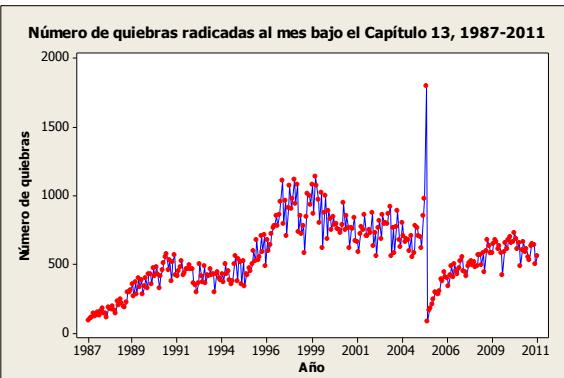

**Panel B**

**Panel C**

**Panel D**

## B. Características descriptivas de las quiebras

En esta sección se presentará el perfil de las quiebras en Puerto Rico desde la perspectiva de cinco características: capítulo que se radica, naturaleza de la quiebra (comercial o personal), deuda estimada, región geográfica (norte, sur, este, etc.) y área geográfica (isla, metro).

**Tabla 1 Serie histórica del número de quiebras anual, 1987-2011**

Mes	Número de quiebras
<b>1987</b>	3,034
<b>1988</b>	3,954
<b>1989</b>	5,940
<b>1990</b>	7,050
<b>1991</b>	8,756
<b>1992</b>	7,784
<b>1993</b>	7,071
<b>1994</b>	7,022
<b>1995</b>	7,955
<b>1996</b>	10,800
<b>1997</b>	15,646
<b>1998</b>	17,434
<b>1999</b>	17,926
<b>2000</b>	14,897
<b>2001</b>	14,402
<b>2002</b>	13,802
<b>2003</b>	14,283
<b>2004</b>	13,308
<b>2005</b>	13,252
<b>2006</b>	5,447
<b>2007</b>	7,777
<b>2008</b>	9,103
<b>2009</b>	11,342
<b>2010</b>	12,430
<b>2011*</b>	8,578
<b>Total</b>	258,993

\*Sólo cubre hasta el 30 de septiembre de 2011

Estas características, a su vez, se compararán para dos periodos: el periodo completo de 1987 al 2011 y el periodo que comprenden los últimos cinco años donde tenemos los datos completos, del 2006 al 2010.

La Tabla 1 presenta el número de quiebras anual desde el 1 de enero de 1987 hasta el 30 de septiembre de 2011. En general se observa un aumento en la radicación de quiebras durante ese periodo, de 3,034 quiebras radicadas en el 1987 a 12,430 en el 2010. Sin embargo, al estudiar la serie con detenimiento vemos que durante ese periodo hay fluctuaciones. Se destaca que el número de quiebras tuvo una tendencia ascendente desde el 1987 al 1991, aumentando las mismas por más del 150%; del 1992 al 1994, el número de quiebras se redujo, pero en el 1995 con el patrón de aumentar anualmente hasta el 1999. Del año 2000 al 2006, se registra una merma de quiebras anual, excepto en el 2003 que hubo un aumento con respecto al año anterior. Se destaca el dato que de 13,252 quiebras en el 2005, se reduce significativamente a 5,447 quiebras totales en el año 2006. Los últimos cinco años (2006 – 2010), la tendencia vuelve a ser ascendente, más que duplicándose las quiebras del 2006 en el 2010.
