2. A change to IFRS might also require companies to request permission from the IRS to change accounting method and might affect computation of U.S. earnings and profits for federal tax purposes. Transfer pricing policies may also be affected. (Tysiac, 2012)

The report identified two areas of state taxation that could be affected by the adoption of IFRS: (1) apportionment of income, if the adoption of IFRS changed underlying apportionment factors; and (2) taxes based on a company’s net worth or equity, if the adoption of IFRS affected either of those. INVENTORY: LOWER OF COST OR MARKET RULE

WRITE DOWN: US GAAP FASB ASC 330

- **USE REPLACEMENT COST: except**
***Note: Apply for LIFO only**

1. Exceed NET REALIZABLE VALUE, NRV
(selling price less cost of disposal)
OR
2. Be less than NRV less normal profit

In that case use the number in the middle of the three alternatives.

TYPE OF INVENTORY

- Can be applied to individual items, inventory categories, or the **entire inventory**

WRITE DOWN: IFRS IAS 2

- **USE NET REALIZABLE VALUE**
(selling price less cost of disposal)

TYPE OF INVENTORY

- Usually applied to **individual items**, although using inventory categories is allowed under certain circumstances

WRITE DOWN REVERSE

➤ NOT ALLOWED

Any write-down of inventory below cost creates a new cost basis that subsequently cannot be reversed

IFRS IAS 2

WRITE DOWN REVERSE

➤ ALLOWED

➤ Recovery of Inventory Loss (current income)

➤ Previously recognized devaluation losses are reversed up to the amount of the original devaluation loss when the reasons for the devaluation no longer exist.
